

We have reached a tipping point!
(Some) current initiatives in
Hawaii

Jeannette Kojane, MPH
Executive Director, Kokua Mau

Today's Topics

- Concurrent Care
- Advance Care Planning
- EOA – ADRC – Aging & Disability Resource Center
- Increase options for care in Hawaii
- Hawaii Island Initiatives
- Kokua Kalihi Valley (KKV)
- Palliative Care usage studies
- Kokua Mau Training
- Palliative Pupus – Clinical discussion (Nov. 16)
- KM Spiritual Care Committee
- Healthcare Reform

Concurrent Care – Avoid the 'terrible choice'

- UHA – all members
 - Allows members to continue to get curative treatments but also enroll in hospice.
 - Offers another layer of care
 - Allows people to keep their care team in place
 - Inspired by Aetna studies, "instinctively the right thing to do"
- Medicaid Pediatric Concurrent Care – Hospice Hawaii linking with providers around Oahu
 - Child with a terminal diagnosis (6 months or less) can enroll in hospice AND get care from their Medicaid provider related to their illness.
 - Allows parents to keep their existing team AND utilize hospice expertise

Advance Care Planning

- Education campaign statewide for general public & practitioners about the importance of
 - The CONVERSATION
 - Documenting wishes (AD & POLST)
- Create statewide materials (written, DVD) – HMSA support
- Electronic registry of documents (could include on-line creation of POLST)

State Executive Office on Aging

- 3 part program under ADRC (Aging Disabled Resource Center) umbrella
- Assist adults, people with disabilities and their loved ones make informed decisions about long-term care needs
 - Improve coordination and collaboration in the Aging Network - between Executive Office on Aging, County offices on Aging (AAAs) and providers
 - Allows better linkages with Federal programs including Affordable Care Act, CMS, Admin on Aging

3 Integrated Aging Network Programs

1. Statewide Aging and Disabled Resource Center (ADRC)
 - Single Entry point
 - Target those most at risk
 - Offer non-bias LTC information
2. Community Living Program (CLP) to keep people home
3. Person-centered hospital discharge planning (HDP)
 - Collaboration btw Area (AAA) & discharge planners to stop readmissions

More options in Hawaii

- St. Francis Outpatient Palliative Care
- North Hawaii Hospital
- Maui Memorial
- Castle Medical Center
- Veterans Administration – in patient hospice & VA contracted nursing home
- Hospice of Hilo – Building an in-patient facility & Hawaii Palliative Care Ctr.

Hawaii Island – “huge amount of synergy”

- Hospice of Hilo new in-patient facility incl Hawaii Palliative Care Center
- Beacon - \$16 million – catalyst to improve coordination of care, communication, quality
- Independent Physicians (IPA) – ACP in the office
- North Hawaii Hospital Palliative Care Program
- Kona Hospital expanding pal care

Kokua Kalihi Valley

- Not-for-profit community health center
 - Established in 1972 by residents of Kalihi Valley
 - 8 million annual budget
 - 330 federal funds
 - For residents of Kalihi Valley & Southeast Asians islandwide
- www.kkv.net

Need in the Community

- Disabled, Homebound persons
- Limited/no access to healthcare
- Stigma
- Caregivers high stress and burden
- Financial burden

Home Based Palliative Care

Who is eligible?

- Homebound/bed bound patients of Kalihi Valley
- Young and disabled
- Frail elderly
- Chronic advanced illness – Neurological, cardiac, pulmonary, renal
- Terminal illness - cancer

The Core Team

Program Goals

- To provide palliative care irrespective of the ability to pay
- To deliver culturally sensitive care to Kalihi Valley residents that would relieve emotional, spiritual, personal and physical suffering
- To inform patients and families of all reasonable choices including hospice care
- To help clients die in comfort, with love and dignity

Benefits of Home Setting

- Increased patient and family control of medical care
- Familiar surroundings
- Decreased isolation
- No need to observe visiting hours
- Less exposure to iatrogenic infections
- Less expense if family member provide most of the care

Home Based Palliative Care -Services Provided

- Primary care
- Case Management
- Respite/Companion services
- Caregiver support groups
- Pastoral services
- Bereavement services
- Education – students, residents, fellows

Caregiver Support Groups

Health Maintenance Groups

Results

- 46 patients and 45 caregivers enrolled in study, Feb 2007 – Feb 2008

Results

- High caregiver satisfaction
- Improvement in symptoms
- Significant improvement in well-being, AD completion, document code status
- Improvement but not significant in symptoms, functioning, transcendence
- Decrease in ER and hospital usage

Hawaii - Palliative Care Studies

2 articles by Bell, Kuriya, Fischberg

Journal of Pain and Symptom Management

- 1362 consults with cancer patients @ QMC

Conclusion is **Consultation Intensity**:

- Strongest predictor of hospice referrals & code status changes
- Reduced the ethnic variations associated with hospice referral

Pain management possible for all ethnic groups

Journal of Palliative Medicine

- 4658 patients of pain and palliative care patients btw 2005-2009 @QMC

Conclusions

- Pain outcomes were similar or better among non-white races than whites
- Surgical patients reported more final pain than cancer patients

Kokua Mau Initiatives

- Training – tailored to organization
 - North Hawaii Hospital
 - Healthways
 - Topics include communication, quality measures, building your program, pain & symptom mgmt
- Palliative Pupus
 - Clinical case discussion –build skills, network – Nov. 16
 - Topic: withholding and withdrawing
